

# Helping a multinational pharma client place their people in both KSA and African countries

## PROBLEMS

- > TASC had been partnering with this pharma multinational for many years.
- > They wanted to expand into KSA and countries like Rwanda, Algeria, Ghana, Egypt, Nigeria and KSA but did not know much about their local labour laws and regulations

## SOLUTION

- > TASC put together a deployment strategy considering all the legal restrictions and the budget constrain to create win-win solution
- > TASC then helped them successfully deploy employees to these countries and they currently have 30 employees deployed through TASC in the UAE and 6 employees in other countries.

## HIGHLIGHTS

- > **The client currently has 36 candidates employed through TASC in 7 countries**
- > **Impressed with the level of quality in terms of deployment, transparency and overall service delivery , the pharma client has continued its partnership with TASC as its preferred staffing**

Total Duration : 30 Days
